

# STONY PLAIN SUN.

VOLUME ELEVEN.

STONY PLAIN, ALBERTA, THURSDAY, OCT. 2, 1930.

Whole Number 530

## Major Strange and His New Post.

There is considerable cause for gratification in the appointment of Major H. G. L. Strange, of Fenn, Alberta, to the position of head of the educational department of the Searle Grain Co.

It will be gratifying to the former wheat champion himself to find the fruit of his life work thus substantially recognised. It will be a source of satisfaction to the company to be able to place their department, a contribution, in the first instance, to better farming, in hands which are not only capable, but internationally recognised as being capable.

It will be reassuring to the great farming population of Canada, and especially western Canada, to know that so great a world authority and withal one of their own number who has shared their fortunes and learned their problems, should thus be put into a position where he will be able to render them still more assistance and give them benefit from his rich experience in the farmer's craft.

The Searle Grain Co. has an elevator at Stony Plain for which Mr. I. I. Peters is the manager; and another at Spruce Grove, which is the capable hands of Mr. J. F. Forbes.

## Town Planning in Alberta. Article 4.

One of the principal objects of town planning is to provide desirable homesites.

Subdivision regulations and provisions of The Town Planning Act referred to in previous articles have been drafted to accomplish this end.

A general regulation is that lots for residential purposes shall be at least 50 feet wide, 100 feet deep, with a minimum area of 5000 square feet.

In a new subdivision, stores and similar structures cannot be erected in a residential district or zone; adequate streets and lanes are to be provided.

The thoughtless and indiscriminate placing of houses on subdivided land can now be curbed.

But where there exists a proper community spirit such infractions of the 'laws' of common sense, of community economy, will probably not be considered by intending purchasers or sanctioned by the owner.

If, however, thru thoughtlessness, ignorance of existing legislation or regulations, these infractions occur, it may mean considerable extra expense to the owner to have necessary surveys subsequently made, or in other cases to move buildings recently erected.

## Flour Down in Price.

Last week's issue of The Sun had scarcely received general circulation when the news was broadcast of a lowering in the price of flour. The article in The Sun dealt with the great disparity between the present price of wheat and the price of flour and bread—so great a disparity that it must have meant a huge profit for the milling interests. The drop in the price of the best flour to \$3.45 for 98 lb bag is not as great as could be wished, but even this means a lowering of the price to the ultimate consumer.

One baker in Stony Plain lowered the price of his bread from 3 for 25c. to 2 for 15c. immediately on receipt of the news of the lowering of the price of flour.

There is yet so big a difference between the prices of wheat and flour that the general wish must be to have the good work continue.

## Funeral of Mr. Geo. Truax.

A fairly large number of friends and acquaintances was present on Friday last, at the funeral obsequies of the late Geo. W. Truax, the prominent farmer of the Brightbank district, whose demise was noted in last week's issue. Deceased was in his 58th year.

Services at the Truax home were conducted by Rev. G. A. Sander, pastor of Stony Plain United church. Interment took place in Inga cemetery.

He leaves to mourn his loss his wife; two brothers—Dr. Truax of Great Forks, B. C., and Mr. C. Truax, South Manchester, Conn.

## Change in Train Service.

A change took place on Sunday last in the running times of some of the trains on this division. Train No. 5, which formerly came thru Stony at 22 28 daily, now arrives at 13 28 every Sunday, Tues. and Friday.

Trains 3 and 4, the Employees' Special (known also as the Confederation) have been taken off this division, for the winter.

Train No. 6, going east at 7.01, runs only on Monday, Wednesday, Friday.

## Soviet System Is Real Menace

Regarding the present-day wheat problem, Hon. Robert Weir, Minister of Agriculture for the Dominion, has this to say: "The menace of Russian wheat lies not so much in its volume, as in the marketing method which the Soviet employs. They take a quantity of wheat and dump it on the market all at once and give the impression of having an unlimited volume. That breaks the market and creates a panic amongst our growers. They think that there is no outlet for their wheat, whereas there is, of course, always an outlet."

## Russia's Five-Year Plan

Under all normal conditions the people of Western Canada would display merely an academic interest in events transpiring and development's taking place in Russia, but for some time past, and to an ever-increasing extent, Russian policy has had a bearing and a definite effect upon the prosperity of this portion of the Dominion, in fact upon the whole business structure of Canada, as well as of our countries.

It is difficult to find out exactly what is taking place in Russia, as many reports are both confusing and contradictory, consequently it is not surprising that people in this country are still puzzled and uncertain in their minds whether Russia constitutes a real and permanent menace to Canada, not politically or in a military sense, but economically.

Certain things have, nevertheless, become fairly well established. For example, it is known that in October, 1928, Russia inaugurated what is known as the "Five-Year Plan" of national development which observers on the spot in Russia describe as "the most interesting economic experiment anywhere in the world."

On October 1, 1930, the second year of this experiment will come to a close. So substantial has been the progress made that now the slogan is: "The Five-Year Plan in Four Years." What is this "Five-Year Plan?" It was outlined by a Soviet Government agency over a year ago, and, in part, the plan—

"Provides for total capital investments in the five years beginning October 1, 1928, of \$33,000,000,000, or about two and one-half times the actual investments in the preceding five years. A goodly share of this will go for the construction of industrial plants and for the purchase of foreign equipment and machinery. The foreign-trade programme calls for imports of about \$3,200,000,000 during the period. Among the outstanding projects scheduled for construction, and in most instances completion, during the five-year period, are two tractor factories with an output of 40,000 units per year each, an automobile factory with an output of 100,000 cars per annum, a score of steel mills to produce over 5,000,000 tons of steel per year, many chemical, textile, machine-building, electro-technical, paper, glass, leather, and other factories, as well as a dozen or more large power plants, many mines, etc."

That was the "Plan," but, according to a Moscow correspondent of the Manchester Guardian, the "Five-Year Plan" in many instances is already surpassing the figures expected to be attained. He says: "The first version of the 'Plan' called for the production of 22,000,000 tons of oil and 10,000,000 tons of cast-iron in 1933; now these figures have been revised upwards, respectively, to 38,000,000 and 17,000,000. During the current year 221, say industrial enterprises, built at a cost of approximately \$425,000,000, have begun to function, and the list of unusually large factories which have been completed comparatively recently, includes a tractor plant, an agricultural machinery factory, a paper mill, a pipe factory, two oil refineries, several electrical stations."

The "Five-Year Plan" also included what practically amounts to the nationalization of agriculture, and the erection of these huge tractor and agricultural machinery factories, oil refineries, etc., are all a part of this new agricultural policy. The Manchester Guardian correspondent in Moscow, further notes that "in collective farming, 20 per cent. of the peasant households have already gone over to the co-operative method, although the 'plan' originally contemplated only 20 per cent. in 1933."

Russia is now dumping wheat, coal, lumber, into many European and other markets, further demoralizing the already badly demoralized world price for these commodities. The Russian Government is reported as having chartered a large number of vessels to convey wheat from Russia to England, Italy, and other countries, and that this wheat will be sold abroad regardless of price. The United States Government has charged that Russia has engaged in transactions on the Chicago grain markets to force down the price of wheat; the Canadian Government has secured power from Parliament to prohibit Russian imports into Canada; the League of Nations at Geneva, is discussing the effects of Russian policy on all other nations.

It is further alleged that under Soviet auspices this great "Five-Year Plan" is being carried out by poorly-paid labor, and much of it forced labor, even convict labor; that the standard of living has been definitely lowered; that food and even clothing supplies are sharply rationed, with the result that other countries, with higher standards of living and greater individual liberty of action, cannot begin to compete with Russia.

The Bolshevik propaganda of Russia failed in its efforts to bring about world revolution, but its "Five-Year Plan" of economic development at home with a view to dumping huge quantities of goods and products of all kinds into world markets is, even before the "Plan" is one-half completed, having an adverse effect in all other countries, and further depressing already depressed business conditions throughout the world.

The farmers of Western Canada, who must depend for their success upon making profitable sales of their products in world markets, are among the chief sufferers.

## When Food Sours

About two hours after eating many people suffer from sour stomachs. They call it indigestion. It means that the stomach nerves have been over-stimulated. There is excess acid. The way to correct it is with an alkali, which neutralizes many times its volume in acid. The right way is Phillips' Milk of Magnesia—just a tasteless dose in water. It is pleasant, efficient and

harmless. It has remained the standard with physicians in the 50 years since its invention. It is the quick method. Results come almost instantly. It is the approved method. You will never use another when you know. Be sure to get the genuine Phillips' Milk of Magnesia for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

## How Saskatoon Is Favored

**Saskatchewan City Attracts Many Important Gatherings**  
Saskatoon has been a much visited city this summer. Recent visitors included the 150 British medics, while on September 7th came the Sun Life special trains; on the 9th the Canadian Ticket Agents' Association and on September 12th the Dakota travelers—some of whom, it is pointed out, may decide to remain in the region. "Commissioner Joseph Holmes," says The Hub, "had to take special exercises to strengthen his right hand against the intensive period of welcoming the strangers within our gates."

## THE ANAEMIC GIRL

**Who Has Lost Her Charm and Beauty**

"She seems to be losing her looks." This remark is often heard about girls who were once noted for their sparkling eyes, their rosy cheeks and their vitality. The cause is not far to seek—They have become anaemic, that accounts for the pallor and the loss of charm. The anaemic girl, if she neglects her health, may be a sufferer all her life.

Take heed, you pale, anaemic girls. Plenty of fresh air, nourishing food and rest will help you, but what you need most is good blood. Those worried headaches, that sickle appetite and those terrible heart palpitations can only be banished if the blood is rich, red and pure.

Good blood—the kind that brings good health is created by Dr. Williams' Pink Pills. The whole mission of these Pills is to build rich, red blood. The Pills are sold by all dealers in medicine or by mail at 50 cents a box from Dr. Williams' Medicine Co., Brockville, Ont.

## High Educational Standard

**Canadian School System Impresses Educationists**

Visitors to Canada are invariably impressed with the country's educational system, particularly if they be men especially interested in the subject. It is greatly to be doubted if any nation on earth could lay claim in the matter of schools of all kinds. Our educational system is thorough, always, standards are high and our graduates emerge from schools and colleges with diplomas that have always placed their services in great demand across the line—Border Cities Star.

Do not allow worms to sap the vitality of your children. If not attended to, worms may work irreparable harm to the constitution of the infant. The little sufferers cannot voice their ailment, but there are many signs by which mothers are made aware that a dose of Miller's Worm Powders is necessary. These powders act quickly and will expel worms from the system without any inconvenience to the child.

## Give the Devil His Due

An old Scottish woman, who had never been known to say an ill word about anybody, was one day taken to task by her husband, "Janet," he said impatiently, "I do believe you say a good word for the devil himself." "Ah, weel," was the reply, "he may be as a good as he might be, but he's a very industrious body."

## The Man With Asthma

Longs for death and ends his suffering. He sees ahead only years of endless torment with intervals of rest which are themselves fraught with never ceasing fear of renewed attacks. Let him turn to Dr. J. D. Kellogg's Asthma Remedy and know what complete relief it can give. Let him but use it faithfully and he will find his asthma a thing of the past.

## Over a Hundred Varieties

A single tree with approximately 125 varieties of apples has been grown near Martinez, California, by George Upham. It took more than twelve years of experiments to obtain the phenomenon. Upham has been grafting branches to the original tree since 1918. In the spring the grafted limbs bud at different times with blossoms in dozens of shades.

## Britain's Youngest Aviator

Miss Winifred Jess Drinkwater of Paisley, Scotland, is Britain's youngest aviator, having just received her pilot's license at 17, the minimum age for a British pilot. In flying solo she handles her machine like an expert. S. Baldwin, secretary of the Scottish Flying School, says she will be a great flyer.

Minard's Liniment aids a hundred uses.

W. N. U. 1857

## Her Two Children Had Summer Complaint

Mrs. J. J. MacDonald, Glace Bay, N.S., writes: "I am the mother of six children, and would not be without a bottle of Dr. Fowler's Extract of Wild Strawberry in the house. My two youngest were very sick with summer complaint, and there was nothing I tried could equal that remedy, and I had tried most everything, but they could get no relief. 'Dr. Fowler's' made a change in both of them in less than two hours."

On the market for the past 85 years; put up only by The T. Milburn Co., Ltd., Toronto, Ont.

## Car Elaborately Equipped

**Fittings in Limousine Of Jugoslavian King Very Complete**

A Packard sedan limousine, recently delivered to King Alexander, of Jugoslavia, is said to be one of the most elaborately equipped automobiles in Europe. The space under the glass partition separating the rear compartment from the driver's space is divided into a number of compartments. A large locker in the centre is fitted with a leather lunch kit, equipped with a complete silver and gold table service. In a double compartment at the right are thermos bottles for warm foods and a large toilet case. Thermos bottles for hot or cold liquids are fitted into a cabinet at the left of the centre locker, and in the top of this space are a first-aid kit and a large cigarette case. A built-in compartment for the King's sword extends across the top of the three compartments, and the lid, which protects the sword against dust, becomes a shelf when closed. Immediately in front of the King's compartment is a trunkspace is a tray to accommodate road maps.

Minard's Liniment aids tired feet.

## Source Of The Thames

**Seven Springs In Cotswold Hills Food World's Most Famous River**

How many people—even among the millions who live upon its banks—could say offhand where the source of the Thames was to be found? The fact that so few of us know anything about the beginnings of the world's most famous river is reflected in the statement, that, until recently the Thames had its source in a rubbish dump. Now the rubbish has been cleared away, and visitors to the source will find a little pool in a wood hollow, with, at one side, a stream gushing out.

It is Seven Springs, the source of the Thames; but there is nothing to tell anyone of this is the case, and in the quiet Cotswold Hills, where Seven Springs is situated, we are not thinking of London and London's River. However, a plan is now on foot to lay out the site in a worthy manner and to build a fountain through which the Seven Springs may flow.

## British Capital For Alberta

**Anglo-Western Oil Limited To Commence Development Work**

Five million dollars of British capital, organized under the name of Anglo-Western Oil Limited, with a federal charter and headed by Sir Edward Manville, chairman of the Phoenix Oil and Transport Company, and of the Dunlaver Company, both of Great Britain, has been made available for Alberta oil development, according to an announcement made in Calgary recently.

The announcement was made by J. C. Dallas, managing director of Calmont Oil Limited. Mr. Dallas said the company had acquired 400,000 acres in Alberta and two wells would be sunk immediately in the Milk River area.

"I notice that customer you just attended to didn't buy anything, yet he seemed pleased," said the eagle-eyed floorwalker. "What did he want to see?"

"Me, at 8 o'clock tonight," replied the pretty clerk, blushing.

How a disease wipes out human beings who are not resistant to it, was shown when influenza was introduced into a Labrador community by 360 Eskimos, causing the death of 300.

# High Protein Content Of Western Wheat Is Revealed In Tests Just Completed

Canada's current wheat crop has a very high protein quality of grade and shows higher gluten content than yields of the past three years. It is revealed in tests just completed for the Canadian Grain Commission.

Result of the tests, conducted by F. J. Birchard, commission chemist, at Winnipeg, were reported yesterday to F. G. T. O'Hara, deputy minister of trade and commerce. Summing up, it may be stated the general baking quality of the present crop is fully equal, if not superior to that of any crop tested since inception of the commission laboratory in 1913, says the report.

"The quality of the protein (gluten) is excellent and the average amounts of 13.4 per cent. compares very favorably with that found in previous years," Mr. Birchard reports. "The average for 1929 was 15.3 per cent., for 1928 was 12.3 per cent. and for 1927 was 11.4 per cent."

"The high protein content of excellent quality, the unusual dryness of the wheat and the excellent baking quality of this year's crop should be of special interest, particularly to the millers of England, France and Germany, since the crops of these countries are reported to be suffering severely from the effect of excessive moisture with consequent damage to the quality of the grain."

"Over 60 per cent. of the crop received to date in Winnipeg this year, graded either No. 1 Hard or No. 1 Northern, 23 per cent. graded No. 2 Northern, and only three per cent. No. 3 Northern. Very little grain graded No. 3 Northern or lower is being received at the present time. Practically no tough or damp cars have been received."

"The weight per bushel of the different grades is practically the same as that of last year, though the weight of the No. 3 Northern is received to date is lower."

"The comparative yield of flour from the different grades is about the same as last year with the exception of that from No. 3 Northern, which on account of the lower weight per bushel, is somewhat lower."

Practically all the wheat is sound and mature, bringing little difference between the baking quality of the grades. Samples from which the test were made were gathered from the three provinces of the prairies, and are characterized as fairly representative of the crop as received to date. Relatively little Alberta wheat was present in the samples tested, however, and character of Nos. 3 and 4 Northern may change somewhat as to weight and flour yield."

The report approves standards for Nos. 1 Hard, 1 and 2 Northern, but sets only tentative standards for Nos. 3 and 4 Northern and Nos. 4, 5 and 6 Special. This, it is stated, is due to the fact that it is considered probable that some frost-damaged wheat from the northern districts may appear later.

The three special grades in the tentative standards, it is mentioned, are included to take care of a certain amount of sound wheat, but of low weight per bushel. Flour yielded from these grades is greatly reduced, and the color is very yellow, but baking quality is otherwise excellent.

**New Mining Regulations**  
Mining syndicates and individual prospectors are being advised that under the new mining regulations for Manitoba, since the taking over from the Federal Government of the natural resources, the assessment work requirement is now only 25 days instead of 40 days.

"Have you any rat poison?"  
"No, but we can let you have a gas oven."—Kasper, Stockholm.

W. N. U. 1807

## Crop Rotation

The Most Efficient Way In Which To Maintain the Fertility Of The Soil

The maintenance of soil fertility is absolutely essential to successful farming. Unless the soil is in a fertile condition it is impossible to produce large crops and large crops are a prerequisite to profitable farming, observe field husbandry experts of the Dominion Department of Agriculture. The adoption of a good system of crop rotation involves no additional expense and is the most effective way in which to maintain the fertility of the soil and thereby increase the yield of farm crops. In addition, crop rotations assist in the control of weeds, and help to keep in check insect pests and fungous diseases. The labour on the farm, too, is better distributed throughout the season when suitable acreages of various crops, planted and harvested at different times, are grown in rotation.

(By Eva A. Tingey)

FOR MANY FIGURES

All Tingey models are created and sketched in Paris and the patterns are made in New York. A stunning sport dress this, and suitable for many figures. It is modish and chic for the normally built woman, and will also have a slender effect for the heavier type. For the short girl it is snappy too, as its long line bodice cut, hip point and skirt panel all have length giving qualities.

Note the smart new vest, too, which buttons out on top one side instead of tucking in as such affairs generally do. Black wool georgette, silk marocain, or white spotted crepe with the suit or marocain vest will make a nice, dressier scheme for the heavier woman.

This pattern may be obtained in sizes 14 to 20 and 24 to 40. It is ready for immediate delivery. It is hand made.

Send 25 cents (in stamps or coin) to Fashion Bureau. Write carefully and plainly your name and address, the number of the pattern and the size you want.

## Guard Against Gases Forming in the Silo

Two Poisonous Gases Which May Occur in Any Silo

Before entering the silo the farmer or any one working for him should make sure that no deadly gases are present, is the admonition of silo experts of the Dominion Department of Agriculture.

At Herron, North Dakota, the other day, the United family, father and four children, had their lives snuffed out by what was reported to be Methane gas. The sheriff who attempted to recover the bodies was overcome and barely escaped with his life, after his son had made two attempts to get his father out of the silo.

Methane and carbon dioxide are the two poisonous gases which are likely to occur in any silo. They have their origin in the decomposition of organic matter. Methane CH<sub>4</sub> is an odorless, inflammable gas which occurs naturally as the product of the decomposition of organic matter, and is frequently met with in marshes and mines, being more familiarly known as marsh gas. Carbon Dioxide CO<sub>2</sub> is a heavy colorless irrespirable gas which extinguishes flame. It is produced by the action of acids on carbonates, through fermentation, and by the decomposition of organic substances.

Both these gases may be present in the silo and owing to the fact that they are heavier than air as they accumulate, they force air away from the top of the silo.

As neither Methane or Carbon Dioxide will degenerate within a few days, it is always well before entering a silo during the winter season, to run the blower a few minutes to insure an adequate circulation of air. At other times, a lighted lantern should be lowered into the silo to insure that no deadly gas is present. If Carbon Dioxide is present the flame will immediately go out.

There is just as much danger from poisonous gases in the silo as there is in an old well but the danger is one which may be easily guarded against and is overcome by an adequate supply of fresh air. As an ensilage is fed from the top of the silo care should be taken to see that the doors are open to allow fresh ventilation. Fresh air should be supplied as directly to the top of ensilage as possible.

## A Big Business

**Agricultural Wealth Of The Dominion Reaches Nearly Eight Billion**

Few people appreciate the dollar value of agriculture in Canada, or realize that it is really a big business. The Dominion Bureau of Statistics estimates the agricultural wealth of the Dominion as for the year 1929, at the huge sum of \$7,978,633,000. This figure is made up of the following estimated values: Lands, \$3,361,061,000; buildings, \$1,382,684,000; implements and machinery, \$668,172,000; livestock, \$884,167,000; poultry, \$63,854,000; animals for fur farms, \$19,477,000; and agricultural production, \$1,667,218,000.

## A Cow With a Record

Belvedere Dekol Ruby—82683, of the herd owned by the Canadian Pacific Railway at Stathmore, Alberta, made the third highest mature record in Canada in 1929, being exceeded by one cow in the Strathmore herd and an outstanding cow in Saskatchewan. On June 14, 1929, she finished a record 27,693 pounds of milk and then went out on the Show Circuit, taking first prize at Brandon and first at Vancouver, Victoria and New Westminster. What she did is seen by comparison with the milk record

# Moist Heat As A Health Factor Should Be Considered In Heating Homes During Winter Months

A family's health and comfort during the winter months, in this or any climate, depend on proper heating more than any other single factor. Family physicians who confirm this. Knowing the essentials of healthful heat is therefore necessary if a householder is to act wisely on this important question.

A healthful summer atmosphere is made up of temperature, air motion and humidity. Temperature alone is not the major problem of home heating, however. The first requisite for healthful, artificial heat is that it provides sufficient humidity to meet the requirements of the body. This is recognized and cannot be ignored except at the expense of health and comfort. Hot dry air in homes may be directly blamed for the 30 per cent. increase in the mortality rate during the winter months. The importance of moisture in the air breathed cannot be stressed too heavily.

Moist heat as a health factor should be given first consideration when making a choice of the system to be installed in a home, for upon it will depend the health of the family. Medical authorities recommend that room temperature never exceed 70 degrees Fahrenheit. To remain in an atmosphere heated above this point lowers both vitality and resistance and weakens the body's ability to cope with the contrast between indoor and outdoor temperatures.

There are still other benefits from correct humidity besides the health of the family, and that is the economy in fuel bills. It costs more to raise the temperature from 70 to 75 degrees than from 60 to 70 degrees, and moist air at 70 degrees is far more comfortable than dry air at 70 degrees.

In the old days it was thought that the atmosphere in the home became vitiated of its oxygen as the air was breathed and charged with carbon dioxide exhaled from the lungs. Recent conclusive experiments disprove this. Occupation of the home assuredly decreases the amount of carbon dioxide, but the results of this are so negligible that the differences can hardly be measured or detected.

In this country of cold winter climates there are three distinct types of heating equipment and each has its advantages and disadvantages. The stove, while crude in many respects, has many advantages over some types of apparatus. The most common types of equipment are the radiator—which may be electric, steam, hot water or vapor—and the register which is used on many and varied kinds of warm air plants.

The operation of these different types of plants affect the occupant of the home. The radiator type heats the home by means of the air in each individual room passing over each in-

dividual radiator and picking up what heat it can as it passes over. When the fire is high, naturally the radiator is hottest and the air moves faster in the room, which causes the temperature to rise more quickly, and as the fire burns lower the air scarcely moves. These radiators and connections must be absolutely water and moisture tight or they will leak, and except for the vent on the steam radiator, there is no chance of any humidity unless supplied by pans or other devices attached to the radiator.

Neither is there any possibility of air circulation except by the action caused by the heated radiator, as mentioned. Somewhat the same action is obtained with the average type of warm air furnace, except that the body of the furnace over which the air passes, by being conducted through the return air pipes to the furnace casing, is much hotter than the radiator, and the air is expanded to a greater degree and purified by being intensely heated, and creates much more action than when passing over the radiator. It has been proven by medical men that a warm air furnace can be operated in contagious hospitals with scarcely any danger of distributing germs to adjacent rooms. This is due to the temperature of the air as it passes the hot furnace and the rapid circulation it attains. We all know from experience that running water will purify itself when in action, in a very short distance.

## Holding Doesn't Pay

**Holding Eggs For A Rise In Price Considered To Be Bad Practice**

The Poultry Division of the Dominion Department of Agriculture calls attention to the fact that it doesn't pay to hold eggs for a rise in the market. Past experience proves that holding eggs is a decidedly unwise practice and does only harm to the egg trade in general, particularly when eggs are held under any condition other than up-to-date cold storage. The old practice of country stores holding eggs for mixing with fresh stock on a favourable market has almost entirely disappeared and, in any event, grading shows the old eggs up at once. Consumers who pay the price for real fresh eggs expect to get what they buy. Eggs should be shipped promptly to market at all seasons of the year.

## Bay Graded Beef

**Blue Brand Grade Is Preferred By The Average Customer**

The Beef Grading Service of the Dominion Department of Agriculture is stimulating public interest in the buying of good beef and each week shows more conclusively that where quality counts beef is bought by grade. Buying beef by grade is the only way you can be sure of getting beef you will like. The grade "Choice" is always branded in red, and the grade "Good" in blue. Blue brand is the grade preferred by the average customer and is the grade in greatest supply.

Dealer: "It's a genuine antique, sir."

Customer: "But you are asking a fearful price for it."

Dealer: "Well, sir, look how wages and the cost of materials have gone up!"

"You may your grandfather's age in 1907 Nonsense!"  
"Well, he died in 1900 aged 100, and now it is 1930."—Pages Gates, Yverdon.

# PLEASURE

The tingling taste of fresh mint leaves is a real treat for your sweet tooth.

## WRIGLEYS

Affords people everywhere great comfort and long-lasting enjoyment. Nothing else gives so much benefit at so small a cost.

It is a wonderful help in work and play — keeps you cool, calm and contented.

ADD A ZEST  
AFTER EVERY MEAL

## WORLD HAPPENINGS BRIEFLY TOLD

Canada has twelve factories for the manufacture of macaroni and the annual production has a value of about a million and a half dollars, according to the latest figures from Ottawa.

Frengier James H. Scullin, of Australia, making his first appearance before the League of Nations Assembly, denounced armaments as a menace to peace and urged the League to call a general disarmament conference.

A cable received by the Child Welfare, Inc., New York, from its administrative committee in China, said 5,000 children are dying as a result of famine and that war and communism are adding difficulty to the situation.

The superannuation of E. R. Cameron, K.C., as registrar of the Supreme Court of Canada, was announced at the Prime Minister's office at Ottawa. He is succeeded by James F. Snell, K.C., a lawyer of Ottawa.

Portage la Prairie, Man., known for its No. 1 hard wheat, has added new laurels to its brow. On the farm of J. Prout, one mile from the town, peanuts and almonds have been produced this season. He grew two sacks of peanuts and a few peawulls of almonds.

James C. Brady, former Conservative member of parliament for Skeena, B.C., has been appointed a census commissioner of the demography branch of the Dominion Bureau of Statistics. Mr. Brady will organize the census of institutions such as hospitals, asylums, penitentiaries, and house of refuge all over Canada.

Mrs. M. Milner, aged 96, is still busy making cane seats at Wycombe, England.

## Real dyes give richest colors!

FOR every home-use, Diamond Dyes are the finest you can buy. They contain the highest quality anilines that can be produced.

It's the anilines in Diamond Dyes that give such soft, bright, new colors to dresses, drapes, lingerie. Diamond Dyes are easy to use. They go smoothly and evenly; do not spot or streak; never give things that re-dyed look. Just true, even, new colors that keep their depth and brilliance in spite of wear and washing. 15c packages. All drug stores.

## Diamond-Dyes

Highest Quality for 50 Years

### I NO LONGER SUFFER WITH

write Mr. M. MacIntyre, 1010 RIVER STREET, TORONTO, ONT. I have been suffering from indigestion, constipation, nervousness, and general ill-health. I have tried many remedies but have not found relief. I have been told that your Fruit-A-Tives might help me. I have ordered a box and will try it. I am sure it will do me good. I am sure it will do me good. I am sure it will do me good.

FRUIT-A-TIVES BRING ALL THROU

W. N. U. 1887

## Wins First Prize For Layer Cake

Above is a photograph of Mrs. W. McKenzie, 9 Fernwood Park Ave., Toronto, to whom was awarded the first prize for layer cake, at the Canadian National Exhibition, Toronto. There were a large number of entries of cakes of various kinds and Mrs. McKenzie not only won first prize for iced layer cake, but also for muffins and small cakes. We give below the recipe used by Mrs. McKenzie for the prize-winning cake.

Golden Layer Cake— $\frac{1}{2}$  cup butter; 1 cup sugar; yolks of 6 eggs;  $\frac{1}{2}$  cup milk;  $\frac{1}{2}$  cup flour; 4 teaspoonsful Magic Baking Powder; 1 teaspoonful of orange extract. Cream butter and sugar, add beat yolks and beat again with butter and sugar until very light. Sift flour and Magic Baking Powder together and add to first mixture alternately with milk. Beat lightly for about ten minutes. Time about 20 minutes. Put together with lemon filling and ice with boiled frosting.

Lemon Filling—1 lemon and rind; 1 cup cold water; 1 cup sugar; 1 egg; 1 tablespoonful flour. Beat lemon-rind and egg together. Stir in lemon juice and sugar. Dissolve flour in water. Cook in double boiler till it jellies and spreads.

Boiled Frosting—Dissolve a cup of granulated sugar in  $\frac{1}{4}$  cup of hot water. Wash down the sugar from the sides of the pan, cover and let boil three or four minutes, uncover and let boil to a rather firm soft ball stage. Pour in a fine stream on the whites of 2 eggs, beaten dry, beating constantly meanwhile. A few Marshmallows chopped and added to the frosting gives a delicious and pleasing flavor.

Douglas' Egyptian Liniment makes the finest blaster known. Invaluable for stock. Leaves the hair roots in natural and healthy condition. Hair comes back. No scar remains.

## Tour To the Orient

Business Men To Sail On Chamber Of Commerce Tour To Japan and China

Several business men of Edmonton and Calgary have already signified their intention of joining the Canadian Chamber of Commerce tour to the Orient, which sails from Vancouver on the "Empress of Asia" on October 16th. The tour will include a visit to Japan and reception by the Japanese Government, and trips to Shanghai, Nanking, Hong Kong and Canton, and the members will be back before Christmas. The tour is not limited to members of Chambers of Commerce and Boards of Trade, but is open to the general public as well.

Athletes recommend Minard's Liniment.

## School For Flin Flon

Mining Town In Northern Manitoba

Town To Have Public School Efforts of the mining town of Flin Flon to have modern public school instruction this year have at last been successful, according to word received in The Pas. Equipment is now being installed in the class rooms, and it is expected that work will begin within ten days.

Financial plans are about complete. With grants from the province, the town, and with the aid of the Hudson Bay Mining and Smelting Co., grades up to eight will be taught this year.

It has been decided to engage Miss Doris M. Foster, of Winnipeg Beach, to teach the primary grades, and Miss Margaret Sutherland for grades three, four and five.

In days of yore if anybody missed a stage coach he was contented to wait two or three days for the next one. Now he lets out a squawk if he misses one section of a revolving door.

Look for this mark on every tin. It guarantees that Magic contains no alum or any other harmful ingredient.

A copy will be mailed free on request.

## Recipes For This Week

(By Betty Barclay)

### BREAKFAST MUFFINS

2 cups special cake flour, sifted.  
4 teaspoons baking powder.  
 $\frac{1}{2}$  teaspoon salt.  
1 egg, well beaten.  
 $\frac{1}{2}$  cup milk.  
4 tablespoons butter or other shortening, melted.

Sift flour once, measure, add baking powder and salt, and sift again. Combine egg and milk and add to flour, beating until smooth. Add shortening. Bake in greased muffin pans in hot oven (400 degrees Fahrenheit) 25 minutes. Makes 10 muffins.

### BAKED FISH

1 average filleted flounder, fresh haddock or whiting.  
2 tablespoons butter.  
1 lemon.  
Salt and pepper.

Grease a plate and lay the fish on it with the skin side upwards. Put in the oven five minutes and the skin can be easily removed. Melt butter in a fat pan, lay fish on it and place in hot oven 400 degrees Fahrenheit, eight to ten minutes. Baste twice while baking. Remove season and squeeze lemon juice over. Serve hot.

To have the children sound and healthy is the first care of a mother. They cannot be healthy if troubled with worms. Use Mother Graves' Worm Extirminator.

## New Market In Egypt

Trial Shipment Of Apples Being Made From Okanagan Valley

A new market for British Columbia apples in Egypt is being opened up by a trial shipment there, under arrangements completed by the provincial department of agriculture. This shipment will consist of 2,000 cases from the Okanagan Valley at a price to net the growers a profit which would be small in a domestic market but satisfactory in an export market. The agricultural department believes that Egypt will offer a large market for British Columbia fruit in the future and is anxious to cultivate this business. A few apples from this country have found their way into Egypt before, but the market has never been built up in a big way.

In many parts of Africa there is a tree which bears large seeds resembling huge sausages.

## A Shaving Lotion

When mixed with sweet oil, Minard's serves as an after shaving lotion and antiseptic. Soothes and freshens the skin.

## SUNDAY SCHOOL LESSON

OCTOBER 5

### ZACHARIAS AND ELISABETH—Life in a Pious Jewish Home

Golden Text: "And they were both righteous before God, walking in all the commandments and ordinances of the Lord blameless."—Luke 1.6.  
Lesson: Luke 1:5-8.  
Devotional Reading: Psalm 122.

### Explanations and Comments

A Righteous Couple, verses 5, 6.—In the days of Herod, King of Judea (Herod the Great, who reigned from 37 to 4 B.C.), there lived a priest named Zacharias, of the course, or group of Abijah. David divided the priests into twenty-four courses, each of which in rotation was responsible for the temple services for a week. Each course, therefore, officiated twice a year, at an interval of six months. After the captivity only four courses returned, but these were subdivided into twenty-four courses under the old manner. The course of Abijah is said to officiated in April and October. The wife of Zacharias, who was a descendant of Aaron, was called Elisabeth. Their home was in the hill country near Bethanien. Both were righteous before God, strict Jews who observed the Mosaic law, kept all the commandments and ordinances. They were not faultless, but blameless according to the Old Testament standards.

The Birth and Naming of John verses 57-66.—When Elisabeth's son was born, all her neighbors and relations rejoiced with her. "There is nothing else in the world so important as children, nothing else so interesting."—David Starr Jordan. Those present at the circumcision of the child when he was eight days old, wished to name him Zacharias after his father, but Elisabeth said, "Not so; but he shall be called John." See verse 13. "John" means "the grace of God." There is none of thy kindred that is called by this name, they said in astonishment, and turning to the father, they asked him what the name should be, making use of signs, for he seems to be supposed deaf as well as dumb. (Verses 18-20, deaf as well as dumb.) Five words cost Zacharias forty weeks silence."—Thomas Fuller. "Various suggestions have been made to evade the conclusion that he was deaf; that men are very apt to treat a dumb person as if he were also deaf; that they communicated by signs instead of by speech to spare the feeling of Elisabeth, whose judgment was being appealed from; that a sign was all that was needed, Zacharias having heard all that was said."—Expositors' Greek Testament. Zacharias called for a writing tablet to take down the name, and upon it he wrote with a stylus, "His name is John."

Then Zacharias burst forth into speech, blessing God. The people were much impressed by his recovery of speech and the unexpected name given the babe, and they perceived that some great future was before the child. "Of the fruit of these things, shall this child be?" they asked. "For the hand of the Lord was with him," the Evangelist comments.

### Strength Of Canadian Woods

A comparison of strength values of wood of sugar maple and yellow birch show that sugar maple is considerably the stronger in the green condition, whereas after seasoning, they are of approximately the same strength. This is revealed through publication of results of the physical and mechanical properties of Canadian woods by the Forest Products Laboratories of Canada, Department of the Interior.

## MAGIC BAKING POWDER never varies

Its uniform leavening qualities give the same satisfactory results with every baking.

3 out of every 4 Canadian housewives,\* who bake at home, say they use it because it does give consistent, better baking results.

If you bake at home, the New Magic Cook Book will furnish you with dozens of attractive baking suggestions.

### Try This Recipe for Muffins

1 tablespoon butter  
2 tablespoons sugar  
2 eggs  
2 cups flour  
3 teaspoons Magic Baking Powder  
1 teaspoon salt  
1 cup sweet milk  
Cream butter and sugar. Add eggs one by one, beat well. Sift dry ingredients together and add to first mixture alternately with milk. 1 batter needs only a little more flour. Put in well-greased muffin pans and bake for 20 minutes in a quick oven.

\*This fact was revealed in a recent Dominion-wide investigation.

GILLETTE PRODUCTS

## Alberta Dairy Record

Last Year 95 Creameries Produced Sixteen Million Pounds Of Butter

The dairy record of the Province of Alberta is an encouraging one. In 1912 the province had only 58 creameries producing a little over 3,000,000 pounds of butter. Last year there were 95 creameries with an output of 16,000,000 pounds. In 1912 six cheese factories produced but 40,000 pounds of cheese, while last year ten factories produced over a million pounds.

## DO YOU SUFFER WITH HEADACHE?

So easy to get quick relief and prevent an attack in the future. Avoid bromides and other drugs. They relieve quickly but affect the heart and are very dangerous. They are depressing and only give temporary relief, the cause of the headache still remains within. The sane and harmless way. First correct the cause, sweeten the sour and acid stomach, relieve the intonities of the decayed and poisonous food matter, gently stimulate the liver, start the bile flowing and the bowels pass off the waste matter which causes your headache. Try Carter's Little Liver Pills. Druggists 25c; red pkg.

## Find Early Coins

Interesting Discovery In Wales Of Gold Coins Minted In 1840

Twenty golden nobles, in perfect condition and apparently fresh from the mint where they were struck to celebrate the defeat of the French fleet by Edward III., at Sully, in 1340, were discovered recently on the edge of a forest, road leading from Talleis, Cardiganshire, to the Dovey Estuary, where a ferry in olden days carried travellers across to North Wales.

The coins depict an English warship breasting the waves and surmounted by the English coat-of-arms and the King's head.

## Pure Bred Sire Areas

Twenty-eight rural municipalities in the Province of Saskatchewan have been established as pure-bred sire areas, which means that these areas have become entirely free of scrub sires.

## Rheumatism?

Quick relief from rheumatic pains without harm!

To relieve the worst rheumatic pain is a very simple matter. Aspirin will do it every time! It's something that you can always take. Genuine Aspirin tablets are harmless. Look for the Bayer Cross on each tablet.

ASPIRIN  
TRADE MARK REG.

## OUTCRY AGAINST THE DUMPING OF RUSSIAN WHEAT

London, England.—Wheat will play possibly a dominant part at the Imperial Conference discussions. The dumping of Russian wheat produced under conditions of semi-serfdom, has raised an outcry not only in rural England but across the agrarian states of Europe.

It has given the movement for wider Empire preference impetus such as no mere academic discussions could possibly have done.

Nevertheless there are strong doubts as to whether the present Labor government would be prepared to impose a duty on foreign wheat. The "Free Traders" and the "Free Fooders," such as Rt. Hon. Philip Snowden, Chancellor of the Exchequer, and Rt. Hon. William Graham, president of the Board of Trade, are much at the economic helm at Downing Street.

The Rt. Hon. J. H. Thomas, Secretary of State for the Dominions, has a counter scheme which would accord preferences by way of bulk state purchases. But although Mr. Thomas has not yet divulged the details of his plan it is meeting strenuous criticism on the ground that it will increase the price of food.

The Daily Herald, Labor organ, dismisses the outcry against the dumping of Russian wheat as a political stunt.

In regard to the conference on Dominion legislation, whose report comes up for consideration at the Imperial Conference, the Manchester Guardian remarks that its findings, as a whole, will doubtless be adopted without much difficulty.

"The right of the British Government to disallow or reserve Dominion legislation has become purely theoretical and the recommendation that it should finally be abolished is not likely to be disputed," says the Guardian.

"It is well, however, to recognize that this means that minorities such as the Southern Loyalists in Ireland and the native groups actually within the Union of South Africa, can no longer, even in theory, look to Britain for protection."

"That Dominion legislation should have extra-territorial validity is also a necessary and desirable result of equality. Difficult questions arise, such as the uniformity of merchant shipping legislation with the Empire, but this will be of the greatest value."

"If a dominion which now has no mercantile marine, asserts its desire to fly its own flag to the exclusion of one which marks it as a member of the British commonwealth, there will be no thunder from Whitehall to deny its right to do so."

The Guardian believes, however, that if the test actually came, the practical convenience of flying a flag which the British navy would recognize—and protect would likely weigh heavily against the pleasure of asserting undisputed independence.

Regarding the much-discussed abolition of dominion appeals to the judicial committee of the Privy Council, the Guardian remarks that those who are alarmed to hear talk of modifying the tribunal's functions may be comforted by the fact that the need for some final imperial court is recognized even by those dominions which have taken the most pleasure in flouting the authority of the present one.

### Seeking Cause Of Depression

Geneva, Switzerland.—Susan Lawrence, Labor chairman and parliamentary secretary to the ministry of health in the MacDonald cabinet, in the name of the British Government urged the League of Nations assembly to institute a world-wide scientific inquiry into the fundamental causes of economic depression reported by virtually all countries on the globe.

### Evolves White Tomato

Vancouver, B.C.—A returned soldier farmer at Chilliwack after years of experimenting, has produced a white tomato. This most unusual variety is non-acid and has been cultivated especially for sufferers from diabetes.

W. N. U. 1857

## Manitoba's First Welfare Conference

Important Conference To Be Held In Winnipeg Early This Month

Winnipeg, Man.—Much interest is now being taken throughout the Province in the first Manitoba Conference on Social Work that is to be held at the Marlborough Hotel, Winnipeg, on the 7th, 8th and 9th of October.

This is to be a conference where everyone interested in social work on any phase of it, and including social workers, church workers, teachers, nurses, municipal officials, school trustees and board members, and those who come in contact with the different human problems of their communities will be welcome, and their part in the discussions appreciated.

Much study has been given over the past nine months to the series of topics related to Manitoba problems that should occupy a place on the program, and to the securing of the most qualified persons to lead in their presentation and discussion. Over fifty men and women, all prominent in their various fields, have already accepted certain responsibilities for this purpose.

Two outstanding speakers, Dr. Bernard H. McGhee, of Orillia, possibly Canada's foremost authority on the training of the feeble-minded child, and Dr. Henry L. McKay of Chicago, a noted student of the problem of the delinquent, are among those on the program.

The problems of the underprivileged or wayward child, the destitute or broken up family, the mental defective, the delinquent, in their various aspects, as well as such general topics as "Health" and "Unemployment" are all listed for discussion.

The financial burden placed on provincial and municipal funds, as well as the calls on the purse of the benevolent individual, are each year assuming greater proportions. There is, in addition, an ever-widening belief, and in consequence, an increasing pressure on the public authorities, that for the general good more should be done in dealing with the problem of the mental defective. In difficult times, such as the one which is now passing through the question of family relief and the proper responsibility for its care is assuming a new importance.

All such questions are giving increased thought and anxiety to those interested in the welfare of the various communities, and emphasize the necessity for seeking an intelligent plan to deal with them.

The State of Minnesota, for over 30 years, has held annual conferences on its welfare work and every year has brought an increasing help to those engaged in social work. A representative attendance from all over the Province should give to this first Manitoba Conference on social work, decisions and results of the greatest benefit, and work out practical methods for dealing with some of the immediate difficulties.

To those desiring the detailed program of the conference, a request to the Secretary, Fred Wolsky, at Winnipeg, Manitoba, will secure it.

### Saving To Dairy Farmer

Cream Exporters Now Have Inspection Free Of Charge

Ottawa, Ontario.—As a measure of relief for dairy farmers producing milk and cream for export to the United States, Hon. Robert Weir, Minister of Agriculture, has issued instructions to the veterinary inspection staff that beginning September 22, inspections required under the United States Federal Import Milk Act to permit of milk or cream being shipped into the United States, shall be made free of charge.

This means a saving to the dairy farmer of from \$2 to \$5 or more for the official inspection of his premises and herd.

### Illicit Narcotics Traffic

League Of Nations Told That Canada Is One Of The Victims

Geneva, Switzerland.—Mrs. Mary Irene Farley, of Alberta, told the social questions committee of the League of Nations that Canada is one of "the victims" of the illicit traffic in narcotics.

She said the situation was improving, however, owing to the arrest of many taking part in the traffic. Thorough control of narcotics entering Canada had also aided in decreasing the quantities illegally brought in.

### NEW CABINET MINISTER

Hon. W. A. Gordon, Minister of Immigration and Colonization, Ottawa, Canada.

### Expect Collapse Of Gandhi Movement

Indian Government Reports Revolt Is Nearing End

Simla, India.—The collapse of Mahatma Gandhi's civil disobedience movement was prophesied in the Indian government's weekly communique on the political situation in the country.

The communique said that the influence of propaganda of National Congress agents was "rapidly evaporating" and though still important in rural areas was destined to fail inevitably because of the deleterious economic consequences of the civil disobedience campaign.

### Relief Work Started

Unemployed Mine Workers Of Nova Scotia Will Receive Help

Halifax, N.S.—Distribution of relief to mine workers and their families in the various colliery districts of Nova Scotia affected by unemployment will be started immediately, the cost to be borne by the Federal and Provincial Governments and the municipalities in communities concerned. This statement was made by P. W. Morrison, president of the United Mine Workers, district 36, and mayor of Glace Bay, following a conference with Hon. Percy C. Black, acting premier of Nova Scotia.

### Executions In Russia

Forty-Eight Revolutionaries Are Shot For Destroying Food Reserves

Moscow, Russia.—All members of a secret counter-revolutionary society, numbering 48, who were found guilty of seeking to starve the population of the Soviet Union by destroying the food reserve of the country, were shot recently by the GPU, as "unreconcilable enemies of the Soviet Government and active counter-revolutionists."

Professor Alexander Ryazantsev and Eugene Karatayev headed the list of executed governmental officials.

### See Trade Revival

Bankers Predict Permanent Improvement In Volume Of Business

Victoria, B.C.—"We have reached the bottom and are at the turn," Sir Robert Holt, president of the Royal Bank of Canada, said here recently in commenting on conditions in Canada.

"There is no stringency of money in the country," commented Sir Charles Gordon, president of the Bank of Montreal, another Canadian financier visiting here.

"The trade of the country has suffered a setback due in some measure to the low price of commodities, but there is a better feeling now," Sir Charles added.

"The revival is coming, but it will be gradual," he continued. "There is plenty of money in the country for the business being done and we are always ready to advance loans for legitimate commercial enterprise."

This year's crop, which has been estimated at four hundred million bushels, is better than had been expected, Sir Charles commented.

"There should be a permanent improvement in the volume of business done by the manufacturers of the country," he said when questioned concerning the new tariff.

### Plane Makes Speedy Trip

Six Hours For Flight From Oklahoma To Winnipeg

Winnipeg, Man.—Nine hundred and thirty miles in 385 minutes—almost 2.5 miles a minute—that is the record made by Daniel J. Moran, president of the Continental Oil Company and four companions, including W. M. Harrison, managing editor of the Daily Oklahoma and former editor of the Winnipeg Tribune, in the fastest trip ever made by humans from Oklahoma City to Winnipeg.

Mr. Moran had a date in Winnipeg with Governor Sales of the Hudson's Bay Company, and he started from the southern city with a forty-mile wind trying to pound his tail all the way through. He left there in the morning and had lunch in Winnipeg and was smilingly shaking hands with Governor Sales nearly 1,000 miles from his starting point in the afternoon. He used his own tri-motorized custom-built Ford monoplane.

### Is Proving a Success

Canadian Cattle Exports To Britain Favorably Received

Ottawa, Ont.—"The resumption of Canada's export cattle trade to the Old Country has apparently got away to a good start," commented H. S. Arkell, Dominion livestock commissioner, following receipt of a report on the initial shipment of Canadian beef cattle to Manchester, England.

"Our cattle have evidently met a very satisfactory reception despite the fact they arrived on the market during one of the hottest spells of weather England has experienced in 20 years," Mr. Arkell said.

"Now that we have made such a good start, Canadian shippers should see to it that no inferior cattle are allowed to go overseas."

## SPIRITED REPLY TO CRITICISMS OF WHEAT POOL

Saskatoon, Sask.—The individual farmer in Saskatchewan is harder pressed financially today than he was in 1923, when the Wheat Pool was organized and depression was worldwide, in the opinion of H. S. Fry, of Regina, publicity director of the Saskatchewan Wheat Pool.

Commenting on the Winnipeg news despatch which said that reports had been circulated to various exchanges that the Pool was facing financial disaster, Mr. Fry said that was "only an exaggerated example of what has been going on particularly during the past three months."

Opponents of organized marketing on the part of farmers, he said, counted the present an opportune time to try to shake the faith of farmers in their marketing organization. The attempt would fail, he was convinced. The Pool was handling a larger percentage of the crop than last year.

Whatever happens, farmers will not go back to a system which the great majority of them have abandoned because of its failure to give the producer a fair return as a primary factor.

The spreading of maliciously falsified reports such as the one circulated recently by the director termed "as treacherous to the national welfare and the welfare of agriculture in Western Canada, as it is well termed psychologically."

"I can only repeat," said Mr. Fry, "what has already been said from so many official quarters, that there is absolutely no foundation whatever for this malicious story."

"This is a matter which, of course, directly affects the business of the central selling agency, but attacks such as this, made under cover and designed to misuse the power of the press, are not unheard of in our experience previously, and are aimed primarily at breaking down the morale of any membership of the provincial pools, on the basis of which the C.S.A. operates."

Many factors combined to create the farmers' serious financial condition, Mr. Fry believed, among these low prices, short crops, obligations to creditors accumulated during years of higher prices, and the general world-wide depression.

"This unusual combination of circumstances is being used to the detriment of the farmer by the most by those who would injure the Pools through any means short of direct libel," he said, "and the incident is only an aggravated example of what has been going on in a lesser way continually and in the last three months in particular."

"All these efforts to undermine organized marketing in this province are foredoomed to certain failure. Farmers may well be disappointed at the present low level of prices. Cash wheat has dropped nearly 50 cents on the Winnipeg market since the beginning of the present crop year."

### Deplores Alarmist Talk

Dr. Swanson Says There Is No Over Production Of Wheat

Quebec, Que.—All alarmist talk of world over-production of wheat was, in his opinion, wholly unwarranted, Dr. W. W. Swanson, of Saskatoon, head of the Department of Economics of the University of Saskatchewan, said, prior to sailing for London, England. Dr. Swanson is one of the wheat experts attending the London conference in an advisory capacity.

"Wheat is the world's basic food; there has never been any true surplus of food and there probably never will be," Dr. Swanson said. "There certainly is none at present, and a country such as Canada may safely regard its stores of wheat as the truest form of wealth, certain to be converted into money on a fair basis of price, despite temporary difficulties of marketing."

### Shows Large Profit

London, England.—The British post office will show a profit of well over nine million pounds, or \$45,000,000 this year, Hon. H. B. Lees-Smith, Postmaster-General, stated. The announcement is being to arouse the advocates of penny postage to fresh efforts.

### BISHOP-ELECT GOES TO NEW DIOCESE

His Lordship J. Rodrigue Villeneuve, bishop-elect of Gravelbourg, Saskatchewan, accompanied by other high Roman Catholic dignitaries, passed through Winnipeg recently en route to Gravelbourg in the Canadian Pacific private car Montmorency. This photograph was taken upon their arrival at Winnipeg where they stayed a short time. From left to right: Bishop Guy O.M.I. Archibishop Forbes, of Ottawa, Bishop J. Rodrigue Villeneuve and Bishop J. Prud'homme, of the diocese of Prince Albert-Saskatoon.

## Stony Plain and District

Rev Kuhring, Mrs Kuhring and family of five, arrived here on Saturday from Anchorage, Alaska, and are the guests of Rev E Eberhardt and Mrs Eberhardt.

Mr J McGillies is spending a vacation at his home at Mountain Park.

Mr A W Ellis on Saturday received the news of the death of his brother at Broun, South Dakota.

Among those who have returned to Stony this week are Bob Stoker, Art Mundt and G Davis.

A goodly delegation of members of the Moose lodge went to the City Tuesday night, as guests of Edmonton lodge.

Martin's orchestra played for the dance at Rexboro the other evening, and have been engaged by the Glee Club for its dance Oct. 10.

The Cash Store will be closed all day today, Thurs., October 2d.

## Railway Time Table

Going East—Every morning at 6.23. Every Monday, Wed. and Friday at 7.01.

Going West—Sun., Tues. and Friday, at 13.28; every midnight at 24.13.

## United Church Notes.

Last Sunday was a day of special services on three points on the charge. At Spruce Grove a special sermon was delivered by Rev A S Tuttle D.D. upon missionary, educational and philanthropic work of the church. This address was listened to with great interest.

At Brightbank the annual rally of church and Sunday school was held and proved a great success.

At Stony Plain there was a special Rally day program given by the children and young people of the Sunday school. This also proved a great success.

## Inquire First.

Motor in Canada: Be cautious. When a woman pulls down her skirt in public, before thou acclaim her modesty do thou inquire whether she hath not bow legs.

## Cause and Effect

"I lost control of my car," complained a young fellow to a friend. "Have a smash-up?" he was asked. "No," he replied, "I missed four payments, and the dealer took it back."

## Open Seasons for Game

Following are open seasons for game—  
Ducks and Geese—Sept 16 to Dec 14th.  
Hungarian Partridge—Oct 1 to Nov. 14.  
Prairie Chicken—Oct. 1-15.  
Pheasant—No open season  
Deer—Nov 1 to Dec 14  
Otter, Nov. 1 to May 1.  
Beaver, No Open Season.  
Muskrat—Between North Saskatchewan and Tp. 91, March 15 to April 30  
Game Licenses can be had at Sun Office, where copies of the Game Act can be seen.

**Buying Hogs, Hides  
Chickens, Eggs and All  
Farmers' Produce,  
EVERY DAY IN THE  
WEEK.**

## Spruce Grove News

Mr Morrow made a motor trip, this week, up to Rocky Rapids, where he is said to be building a store.

At the regular service at St Matthew Lutheran church (Manitoba Synod) on Sunday last, two young people, Hugo Zajt and Irving Goebel, were confirmed by the pastor Rev G Poetzsch.

Spruce Grove Councillors meet on Monday next, October 6th, in the Municipal hall.

Friday was Flying day for localites, and Airman Hansen made a number of trips up with his biplane, circling to Stony and back. Late in the afternoon the Duke embarked, but hadn't got up over 100 feet, and was talking with his hands, when his bonnet blew off. He tried to climb out on the wing to get it, but Mr. Joe pulled him back by the leg. Airman Hansen is working out of Ledue this week.

Those in the district who appreciate a good meal will be pleased to hear of the chicken supper to be given in Moose Hall on Wed. Oct. 22.

Local elevator men have been taking in fairly large quantities of grain, when the threshing machines are running. They also report the quality of the wheat as surpassing any they have handled here heretofore—a good No. 2 being the rule.

On Sunday Oct. 12 Harvest Festival services will be held in St Matthew church (Manitoba Synod), Rev G Poetzsch pastor.

The rumor still persists that another butcher will shortly Horn in here and open a butcher shop.

## Canada's First Electric Tug

The first electrically-driven tug to be built in Canada was launched at Lauson, Que., recently, when the "Prescott" Diesel-electric tug for the Canadian Pacific Car and Passenger Transfer Company's service between Prescott, Ont., and Ogdensburg, N.Y., slipped gracefully into the waters of the St. Lawrence after the traditional bottle of champagne had been broken across her bows by Mrs. Duff, wife of M. McDuff, manager of the Canadian Pacific Great Lakes Steamship Service. As a pioneer feature in Canadian shipping, the Diesel-electric engines with which the new vessel is equipped, are of special interest to marine engineers. Each of 500 H.P., they are directly connected to twin generators capable of delivering 350 kilowatts, each at 250 volts, when operated at 245 revolutions per minute. In operation, a car barge with three tracks for 16 hundred-ton cars, will be lashed to the starboard counter of the tug which it will be possible to control either from its own wheel-house or from the bridge of the car barge.

### CHAPTER I.

When, after years of slavery to the whims of a hard old uncle, Nicholas Hastings went forth on his quest for freedom, he started tramp-wise, his belongings tied in a blue-checked handkerchief which he had bought for the occasion. For years he had foreseen this departure from the home of his fathers—the haughty farewell he should bestow upon the fate uncle—the tears of his gentle Aunt Nettie when he took her in his arms. But Fate frustrated those plans. His patient little aunt had been laid away in Elmwood Cemetery two months before, and once a week his uncle had followed her, as if, Nick thought with grim and sacrilegious humor, he was loath to let her enjoy a peaceful residence in her Heavenly Mansion.

So there were no farewells to say. Instead, Nick left by the back door (because he didn't want Selma Smith, the village gossip, to see his stock and handkerchief), and stood for a moment looking off at the familiar landscape.

He had always loved the view from this little porch. An orchard sloped gently to a green interval, through which a sleepy river travelled to the sea. One wouldn't have dreamed that the house stood on a dusty thoroughfare. From here were visible only "green pastures and still waters." Nick could remember sitting here with his mother on summer evenings, and after his mother's death, with old Aunt Nettie. For a moment a wave of tenderness for the place swept over him; then youth flooded back with an intoxicating exhilaration. He slipped the door key into his pocket, and with no time of regret vaulted the stone wall and strode across the orchard, where, once beyond the eyes of curious neighbors, he would strike into the broad highway.

Free! No more toiling over ledgers in that stuffy corner of the First National Bank! No more horrible deceit when he got a raise, for fear his uncle would claim it for added board. No more stifling of natural impulses. How had he endured those years?

"I've been a slave," said Nick, pausing beneath an ancient apple tree, "but I'm a slave no longer. I can conquer the world!"

Then, because he knew he was behaving like a foolish little boy, he laughed at himself, and reaching up, picked a spray of apple blossom, breathing deeply of it.

"May!" he exclaimed. "May in New England—and I'm free! Gee! how I've longed for just this moment—longed to start out with no cares or responsibilities—without even a destination, and all my possessions in a blue bandanna! As Gay would say—"

He stopped, suddenly, at an amazing thought. He had forgotten to say good-bye to Gay! What a cad he was—especially when she was alone in the world like himself. He might send her a postcard—but no, that wasn't fair. Gay had always sympathized with his dreams and encouraged him

to believe they would come true, as they had. In these last busy days of settling affairs, he had—forgotten her.

"I'm an ungrateful scoundrel," he told himself; and though it meant retracing his steps, and the risk of passing Selma Smith's back window, he faced about immediately, and was rewarded by the sight of a pink-lad figure bending above some budding jonquils. Nick whistled softly, and, starting up, the girl faced him.

"You're off—so soon?"

The color that powdered in her face might have come from her sudden change of attitude, or from emotion. Nick never saw it, so wroth was he in his own affairs.

"I'm off," he echoed. "Did you suppose I'd stay here mourning my dear late uncle? Don't look so shocked, Gay. I needn't pretend to you, need I, that I'm bereaved?"

"I'm not shocked," the girl protested instantly, "only surprised. I've been thinking every day that you'd run in—"

"My dear, I've been deep in—packing!"

He laughed, proudly displaying his handkerchief and stick.

The girl laughed too, and said: "Where are you going?"

"Where?" Nick looked at her reproachfully. "Have you shared my plans so sparingly all these years, Gay, that you ask that question? Where indeed! To the ends of the earth!"

He threw both arms wide, as if to embrace the universe, and Gay smiled; a wistful smile that caught at something in his heart which hitherto had remained untouched.

"With I were a man, Nick,"

He answered, his eyes devouring her sweet girliness: "You're pretty nice as you are. I don't think I'd want you changed, Gay; and I don't believe you would change, if you could."

He stepped down on the grass beside the jonquils, and, as if he had forgotten his haste to be away, Nick sat beside her, his hands clasped round his knees.

"Oh," she said honestly, "I wouldn't change, of course; but it must be wonderful to start off as you are starting. Nick. Do you suppose I, too, don't long to go 'to the ends of the earth'? Do you imagine I like living here with Sadie Twichel, and sewing on other women's clothes in order to pay my board?"

Nick looked at her, his brows drawing into a frown.

"To you, now," he admitted, "I never thought of it. It's because you're a girl. Somehow one doesn't expect a girl to go g-yapping, though why she shouldn't—Gay," he broke off suddenly, "what pigs men are!"

She laughed.

"One would hardly call you that, Nick, after the way you stuck by your Aunt Nettie."

"But I am," said Nick, still frowning. "I came to say good-bye to you" (his honesty made him want to reveal the fact that in selfishness he had almost forgotten the farewell, but his kind heart forbade the disclosure that he knew would hurt her).

"I came to say good-bye, never thinking that you, too, might long to do what I am doing. I'm ashamed of myself, Gay. What must you think of me?"

"I think," she said, meeting his eyes soberly, "that you're getting just what you deserve—a good time. What do you think of me, to imagine for a moment that I don't rejoice with you? Nick, you're only a boy, and you've never had much fun. Why shouldn't you be a little thoughtless? I—I believe I'm glad you are!"

He stirred, a bit uneasily, while Gay added with an understanding smile: "I mustn't keep you. I know you're chafing at the bit."

She arose, leaning down to brush an imaginary something from her skirt; and as he got to his feet she stretched out a friendly hand.

"Good-bye, Nick. The best of luck to you."

He took her hand, squeezed it hard, and lifting the stick and bundle, said, with a galety that was a little forced: "Well, I'm off. I'll drop you a postcard from California, or Alaska, or Timbuctoo, or wherever I happen to land. Good-bye, old friend."

He found it unaccountably difficult to meet her eyes, so didn't meet them. But he got away. He got as far as the stone wall that divided Miss Sadie's land from Selma Smith's. Then he turned, though even as he did so something would have told him that it was dangerous to look back. He turned squarely about, his hand raised in a last salute.

## HOW ONE WOMAN LOST 47 POUNDS OF FAT

"I have been taking Kruschen Salts for nearly 8 months. I have continued taking one teaspoonful in warm water every morning. I then weighed 217 pounds, was always bothered with pains in my back and lower part of abdomen and sides."

"Now I am glad to say I am a well woman, feel much stronger, years younger and my weight is 170 pounds. I do not only feel better but I look better, so all my friends say."

"I shall never cease taking my daily dose and more than glad to highly recommend it for the great good that is in it."—Mrs. S. A. Solomon.

"P.S.—You may think I am exaggerating by writing such a long letter but truly I feel so indebted to you for putting out such wonderful facts that I cannot say enough."

Gay was standing just where he had left her, but it seemed to Nick that all the buoyancy of youth had dropped from his face, leaving behind against the gnarled trunk of an old apple tree, with the jonquils at her feet and the pink, sweet blossoms all above. In her pink gown she should have looked the embodiment of spring; but in reality she dropped, like a flower plucked by some ruthless hand and left to die. Nick couldn't bear it. He tossed his stick and bundle, emblems of freedom, to the ground, and strode back, while Gay, pulling herself together, ran to meet him.

"Did you forget something?"

"Yes," said Nick. "I forgot the best friend a fellow ever had. Gay, listen. You'll think me crazy, but—why don't you come along?"

"With you?"

Her eyes widened at the amazing proposition.

"Why not? It would be bully. I

Fortunately for Gay there was a rustic bench behind her. She sank down breathlessly, while Nick, with a cautious glance at the hedge that hid them from Selma Smith, took the place beside her.

"We could have the time of our lives," he urged. "I've always done things alone, but with you along—"

Gay found her tongue.

"I believe you are crazy," she said sternly. "What would people think? They'd say—"

"Oh, Lord!" Nick interrupted, with a characteristic grin. "I mean, of course, that we'd get married first."

"Get married!"

He laughed at her amazement.

"Why not? It's been done before. We're both of age, you know. Why shouldn't we?"

"But—you don't love me."

"Nonsense! I love you a lot. Always have. Of course, if I'd bore you

(To Be Continued)

Wealthy residents of the ill-fated city of Pompeii had houses consisting of as many as forty rooms.

for ANY CHILD

WE can never be sure just what makes a child restless, but the remedy can always be the same. Good old Castoria! There's comfort in every drop of this pure vegetable preparation, and not the slightest harm in its frequent use. As often as your child has a fretful spell, a twitch, or cries and can't sleep, let Castoria soothe and quiet him. Sometimes it's a touch of colic. Sometimes constipation. Or diarrhea—a condition that should always be checked right away. Just keep Castoria handy, and give it promptly. Relief will follow very promptly; if it doesn't, you should call a physician.

Fletcher's CASTORIA

## After Thirty-Three Years

Bodies of Arctic Explorers in Excellent State Of Preservation

The bodies of Salomon August Anderson and his two companions, according to the dispatches, were in an excellent state of preservation when they were found on White Island in the Arctic Sea, although it has been thirty-three years since they disappeared. This curious refinement of cruelty in the rigid parts of the earth, to preserve for years the appearance of life even in death, has made its impression on the human imagination long before now.

We recall a short story many years ago about a couple who went to the Alps on their honeymoon. The man fell into a crevasse and the guides were unable to recover his body. The girl, frantic with grief, consulted scientists as to what she could do. They told her that the glacier moved a few inches a month; at the end of fifty years, perhaps, it would move far enough to make possible penetration of the crevasse. So for fifty years she waited. And at the end of that time the body was recovered, and she by now an old, decrepit woman, was permitted to look at the body of her husband. It was perfectly preserved, and she saw the handsome boy she had married fifty years before.

## The Third Emigration

Russia Worried Over People Who Will Not Come Back

The Russian Government is considerably worried over what has been designated as the "third emigration." The first emigration was that of the Socialists and anarchists in czarist days. The second was that of the one or two million Russians who fled to the west from the Bolshevik terror. The third is that of the "nonreturners," soviet citizens appointed to diplomatic or other posts abroad who refuse to go back home when so ordered. The penalty for such refusal is death and confiscation of goods.

The third emigration is a striking indication of the conditions of tyranny prevailing in Soviet Russia. When government officials, presumably selected for their special skill in the cause, desert the spot of state in considerable numbers there is reason to believe that the soviet system ought to be confined to Russia.

The Poor Man's Friend.—Put up in small bottles that are easily portable and small, Dr. Thomas' Electric Oil possesses power in concentrated form. Its cheapness and the varied uses to which it can be put make it the poor man's friend. No dealer's stock is complete without it.

## Is Fond Of Music

Ramsay MacDonald Listens In On Radio Broadcast Program

Ramsay MacDonald, Prime Minister of Britain, is a great lover of music.

Speaking at the jubilee of the Guildhall School of Music in London, England, Mr. MacDonald said he had enjoyed many Sunday afternoon listening to the broadcast of Bach's church cantatas from the school.

"I confess that whether I am at home in my quiet peaceful hours in Hampstead or down at Chequer, the Prime Minister's official residence, he continued, 'I make it a rule to issue an order—and I am not given to that very much—that there shall be no engagement, no interference, no business, but that my friends and I shall retire to a quiet corner and spend a very inspiring, comfortable, and peaceful half-hour listening to the broadcast.'"

No Room For Argument

At an exhibition of paintings, recalls Sir John Ross, former Lord High Chancellor of Ireland (in his reminiscences, "Pilgrims' Scrip"), this conversation was overheard between two women who were looking at a picture, "The Dance of Salome":

"Now, what's that, Maria?" asked one.

Maria (glancing at catalogue): "Solomon dancing for Herod."

"But he never does it, Maria?"

Maria (tartly): "He must dance, else he couldn't be photographed."

"If—If your father, catches me eloping tonight I wonder what he'll say to your mother?"

She—"He'll probably say 'Sh-h-h'!"

Minard's Liniment for Chest Congestion.

**Caught Disease On the HANDS!**

This disease threatens us every day. Invisible germs of blood-poison, eczema, etc., are waiting to infect the least cut or sore place. The money you use carries germs—you get them on the handles, rails and straps of the trains and street cars, and in a score of other ways.

Solely through Zam-buk, Mr. Henry C. Davis, of South 17th Street, Kansas City, U.S.A., has just escaped a virulent type of eczema, contracted, he suspects, through use of public towels.

"I had medical advice," he says, "tried in addition all sorts of so-called eczema remedies, without finding the hoped-for relief. Zam-buk treatment soon gave positive results. It took away the painful irritation and quickly purified and healed the deep troublesome sores."

## Little Helps For This Week

"Blessed are they that keep my ways."—Proverbs viii. 32.

And oh! in my exceeding weakness, Most Thy strength perfect; Thou art strong; Aid me to do Thy will with meekness, That to whom all my powers belong.

If thou wilt but go on with thy duties, desiring to love—in such cases the desire of loving is love in His sight—the irksome dullness and dryness is the thorn in thy flesh, the messenger of Satan to buffet thee. But fear not; God's grace is sufficient for thee; His strength will be made perfect in thy weakness. Only set yourself in earnest to obey His voice. Say to Him, night and day, "Behold the servant of the Lord! be it unto me according to Thy Word."

—John Keeble.

Persian Balm—the ideal toilet requisite for every discerning woman. Perfect in results. Creates complications of rare beauty and charm. Delectably cool and refreshing. Never gives a medicinal taint. A velvety smooth lotion toning and stimulating the skin. Making it truly rose-scented in texture. All dainty women invariably choose Persian Balm. It imparts that subtle distinction so characteristic of the elegant woman.

## Feed Skim Milk

Feeding tests at the Cap Rouge Experimental Station of the Dominion Department of Agriculture show that it pays to feed laying hens skim milk. Five years tests show that with a basal ration of grain meal, shell and vegetable feeds, hens fed skim milk laid more eggs and gained more in weight than hens fed beef scraps. Incidentally the cost of skim-milk is just one-ninth that of beef scrap.

Nearly 1,400 automobiles a month are being imported into Sweden.

**Daughter Is Stronger Now**

"My daughter Catherine is fifteen years old. She was very irregular, often sick at her stomach and had to stay in bed two or three days at a time. One of your booklets was sent to us by mail so I got her a bottle of Vegetable Compound. Catherine has been taking it regularly and she is gaining in weight and every way. I told the neighbors and four other girls are taking it with good results."—Mrs. M. J. Johnson, Box 14, Thomloe, Ontario.

Lydia E. Pinkham's Vegetable Compound

Prepared by Dr. J. C. Pinkham, Lowell, Mass.

Five years tests show that with a basal ration of grain meal, shell and vegetable feeds, hens fed skim milk laid more eggs and gained more in weight than hens fed beef scraps. Incidentally the cost of skim-milk is just one-ninth that of beef scrap.

Nearly 1,400 automobiles a month are being imported into Sweden.

"My daughter Catherine is fifteen years old. She was very irregular, often sick at her stomach and had to stay in bed two or three days at a time. One of your booklets was sent to us by mail so I got her a bottle of Vegetable Compound. Catherine has been taking it regularly and she is gaining in weight and every way. I told the neighbors and four other girls are taking it with good results."—Mrs. M. J. Johnson, Box 14, Thomloe, Ontario.

Lydia E. Pinkham's Vegetable Compound

Prepared by Dr. J. C. Pinkham, Lowell, Mass.

Solely through Zam-buk, Mr. Henry C. Davis, of South 17th Street, Kansas City, U.S.A., has just escaped a virulent type of eczema, contracted, he suspects, through use of public towels.

"I had medical advice," he says, "tried in addition all sorts of so-called eczema remedies, without finding the hoped-for relief. Zam-buk treatment soon gave positive results. It took away the painful irritation and quickly purified and healed the deep troublesome sores."

"Blessed are they that keep my ways."—Proverbs viii. 32.

And oh! in my exceeding weakness, Most Thy strength perfect; Thou art strong; Aid me to do Thy will with meekness, That to whom all my powers belong.

If thou wilt but go on with thy duties, desiring to love—in such cases the desire of loving is love in His sight—the irksome dullness and dryness is the thorn in thy flesh, the messenger of Satan to buffet thee. But fear not; God's grace is sufficient for thee; His strength will be made perfect in thy weakness. Only set yourself in earnest to obey His voice. Say to Him, night and day, "Behold the servant of the Lord! be it unto me according to Thy Word."

—John Keeble.

Persian Balm—the ideal toilet requisite for every discerning woman. Perfect in results. Creates complications of rare beauty and charm. Delectably cool and refreshing. Never gives a medicinal taint. A velvety smooth lotion toning and stimulating the skin. Making it truly rose-scented in texture. All dainty women invariably choose Persian Balm. It imparts that subtle distinction so characteristic of the elegant woman.

Feeding tests at the Cap Rouge Experimental Station of the Dominion Department of Agriculture show that it pays to feed laying hens skim milk. Five years tests show that with a basal ration of grain meal, shell and vegetable feeds, hens fed skim milk laid more eggs and gained more in weight than hens fed beef scraps. Incidentally the cost of skim-milk is just one-ninth that of beef scrap.

Nearly 1,400 automobiles a month are being imported into Sweden.

# A TRIUMPH FOR THE CHEVROLET! The Longest Auto Trip on Record.

Triumphing over fever, bandits, adverse weather conditions, and having blazed their own trail over thousands of miles of mountain and jungle country, two courageous Argentines, Adam and Andrew Stoessel, recently arrived in New York in their CHEVROLET SEDAN. They are the first men to pilot an automobile from Buenos Ayres to the United States. It took them two years and they used 6600 gallons of gasoline on their 19,000 mile jaunt, the 80-mile stretch between Carthage, Colombia, and Colon, Panama, being the only part of the trip that the Auto did not cover by road.—The above is recorded by "The Automotive World."

GLEE CLUB'S DANCE,  
FRIDAY, OCTOBER 10.  
MOOSE HALL, STONY PLAIN

## Golden Spike

The funeral took place on Friday afternoon last of Mr Carl Schweitzer, of Golden Spike district. Deceased was in his 66th year.

A service was held at the Schweitzer residence, and another service at St Paul's Lutheran church (Missouri Synod) by the Rev. Wack, pastor.

Deceased was one of the old-time residents here, and was well and favorably known thruout the district as an enterprising and capable farmer.

## Hansen's Corners.

On Sunday, Sept. 21st, to the wife of Mr Geo Clausen, a daughter.

Mr Don McDonald is said to have threshed a record crop this year—the total being 4500 bu. for all grains.

Mr Carl Grosskopf wishes his customers to know that he intends staying in the district this winter, and sawing lumber at his mill. He is at present engaged in hauling grain with his truck.

Practically every housewife in the district is ready to dispute the right of the Iowa girl who claims to be the champion hog feeder.

"Certain kind of glasses create the impression that everything is round," remarked one of our local Scots this morning, and continued "other kinds, again, create the impression that everything is going 'round."

We hear the report that one of our threshing outfits will keep going till Christmas.

## Bright Bank Birds

Threshing operations are progressing very favorably in this district and crops are turning out much better than at the beginning. The wheat yielding from 30 to 55 bu. per acre, with Hansen's Corners district going slightly higher.

What might have proven a serious accident was averted by the quick action of John Kotscherofsky, when Mr E A Holt accidentally stepped in the feeder of a threshing machine the other day. As it was, Mr Holt lost one shoe which got caught and went thru the machine.

While hauling grain to Carvel from the Dr MacEwan farm last week, Mr C Grosskopf had the misfortune of turning over his truck, slightly injuring the driver and the truck.

A band of 25 laborers came into the district last week, 5 finding work in this district. The balance found employment on threshing machines in nearby districts.

Miss Olive Jameson, of Inga, is visiting with her sister Mrs D Dickie.

Many duck hunters are in the district and getting good bags, many of the feathered beauties having no webs between the toes owing, no doubt, to the scarcity of water.

Corp. Stirling of Jasper was visiting his wife and family last week.

Your correspondent regrets that, owing to the busy season, she has been somewhat irregular in sending in news to The Sun, but promises better for the future.

## Church Services.

On Sunday next, Oct. 5th, the Harvest Festival will be celebrated in the Baptist church at Glory Hills. There will be special choral service.

Services in St Philip's Church next Sunday, 11.30 a.m.

United Church service every Sunday Evg. at 7.30.

Harvest Festival services were held on Sunday last at Reform church at Glory Hills. Rev C H Reppert pastor.

## Hi's Invitation.

Hiram Hodgins wishes to inform the party who took the lady's dress from his clothes line that, if they call again, they may get the collar to the dress, which they overlooked.—Vermilion Standard.

## U. F. A. for H. B. Route.

The United Farmers of Alberta group in the House of Commons is said to have given assurance that it stands in favor of speedy completion of port facilities at Churchill in time to allow of shipments of grain over Hudson Bay route in 1931.

## Rimby Editor Dies.

J J Quinn, owner and editor of the Record, published at Rimby, on the line west from Lacombe, shot himself last week, dying instantly. He was an ex-soldier, had run a paper at Sedgewick, and on selling out there had gone to the Coast. On his return, he operated the Record at Rimby. He leaves a wife and a 14 year-old daughter.

## Robbers Use Aeroplane

An epidemic of bank robberies is sweeping like an October storm across the American prairies. Up to a week ago sixteen Farm Belt banks had been looted at the point of guns. The robber bands have moved by motor cars and in one instance by aeroplane, over the same territory as that "worked" by the Jesse James bandit outfit half a century ago, from Missouri to Canadian line.

## Who Accompanied Premier Bennett.

In answer to an inquiry as to who represents Western grain raisers and dealers on the deputation which accompanied Premier Bennett on his trip to England, it may be stated that those who accompanied him, among others, were: A J McPhail, president of the Canadian Co operative Wheat Producers; Dr D A McGibbon, vice chairman of Board of Grain Commissioners; J A Swanson, University of Saskatchewan; and John I McFarland of Calgary. The latter gentleman was formerly the head of the splendid organization which he built up into the Alberta Pacific.

The first electrically-driven tug to be built in Canada was launched at Lauson, Quebec, recently, when the "Proscott". Diesel-electric tug for the Canadian Pacific Car and Passenger Transfer Company's service between Prescott and Ogdensburg, slipped into the water under the command of Mr. J. Lawrence after the traditional bottle of champagne had been broken against her bows by Mrs. M. McD. Duff, wife of the manager of the Canadian Pacific Great Lakes Steamship line. It is the first electric tug to be built in Canada, and is designed to tow a three-track railway car-float with accommodation for 16 hundred-ton cars.

Canada is taking advantage of all opportunities to fight tuberculosis and I think is far ahead of England in the matter of sending students to sanatoria to make an intensive study of the subject, said Dr. J. A. Coult, of London, member of the group of British Tuberculosis experts, interviewed about S. S. Montclair, on his return to England after some weeks' stay in the Dominion.

Stating that the Canadian Chamber of Commerce official tour of Japan and China, leaving Vancouver and Victoria October 16 aboard S.S. Empress of Russia, offers a splendid chance to compare Canada's position as a trading nation, Col. J. H. Woods, Calgary publisher and president of the Canadian Chamber of Commerce, speaking to 300 members of the Vancouver Board of Trade at an address at the Hotel Vancouver recently, urged Canadians to take full opportunity of the chance afforded by the tour.

Canada's wild life has a capital valuation of one billion dollars and represents a yearly business turnover to the Dominion of about \$45,000,000, Dr. H. F. Lewis, of the Department of the Interior, told the delegates to the Provincial-Dominion game conference at Ottawa the other day. The valuation includes the fur harvest, game fish and their attendant effect upon the manufacturers of firearms and fishing tackle not to mention railways, tourist camps, magazine publishers and others who derive a certain revenue from this source.

Badges will be worn by all big game hunters in New Brunswick during the season opening September 15 for deer and October 1 for moose. During the recent year all deer-incident hunters in New Brunswick have worn badges and the system has proved so satisfactory as to render extension of the plan to shooting advisable.

This year's crop of grapes in the Niagara fruit belt, between Hamilton and Niagara Falls, Ont., is expected to reach about \$5,000,000, an increase of 15 per cent. over the 1929 crop. The crop is now being harvested.

A shipment of 125 live cattle from farms in Ontario went forward recently to England, the first in 18 months. It was consigned to buyers in Manchester. The shipment, though comparatively small, is regarded by the live stock trade as marking resumption of Canada's export trade in cattle to the British market.

## Why Suffer from Headache,

Pain in and around the Eyes?

The right glasses fitted to your eyes will surely relieve you and give you comfort.

Glasses furnished Free.  
Fifteen dollars examination fee.

That is far cheaper than paying \$3 to \$10 for an examination and then glasses at \$12 to \$15; but you cannot see the logic of this; you need more than glasses.
